

Sacred Warriorship Path III

In this workshop, we look at our journey from the higher perspective of the Eagle as we embark on a new understanding of what it means to be a sacred warrior.

The archetypal energy of the eagle includes the element of Air, seeing the big picture of our lives with fierce clarity, the willingness to dive down and grasp the truth and the ability to rise again time after time. It means letting go of our old earthbound sense of safety and risking everything as we accept responsibility for doing what we are capable of.

In many cultures around the world, the eagle over all other birds has represented a tremendous power of spirit and connection to the divine. The eagle brings a sense of renewed hope and promise as it connects us to a higher version and vision for our self and humanity. It is associated with the element of air and the direction of the East where the sun rises.

As warriors with a vision of our destiny as spiritual leaders in this Age, we are called upon to rise up to meet these new challenges both personally and collectively. The eagle shows us the way of personal discovery, integrity, grit and freedom to find our courage as we rise up and meet the new day.

Eagle medicine is powerful healing and transformational energy that supports us in digesting and integrating our own wounds to enable a transformation of our inner Chiron warrior. With this alchemy we grow wings and take flight, living out our destiny as warriors of the heart as we soar into unknown realms with full responsibility for a new life!

This workshop includes: teachings, experiential activities, ritual, shamanic breathwork and processing to support you in entering a new relationship with your inner warrior and making courageous changes in your life as you come into right relationship with yourself and others.
